Qualification Profile

I am a student majoring in Informatics Engineering at Satya Wacana Christian University with a GPA of 3.88, currently in my sixth semester. I am particularly interested in Software Engineering and Data Engineering, with a particular focus on the development, testing, and optimization of web-based applications and data-driven systems. I have hands-on experience in web application development using Laravel (PHP), as well as website design and data processing such as data analysis and image processing. I am proficient in SQL for data manipulation and analysis, and experienced in working with relational databases like MySQL and non-relational databases like MongoDB. Furthermore, I have programming skills in Python and Java, including experience leveraging APIs for data integration and system interoperability. I have a basic understanding of ETL (Extract, Transform, Load) processes, data modeling, and data warehousing concepts, which supports my interest in building efficient and scalable data pipelines. I am capable of developing responsive and user-friendly front-end interfaces, as well as building robust and reliable back-end systems that ensure performance, scalability, and maintainability.

I am also familiar with using Git as a version control system, which enables effective collaboration and code management throughout the software development cycle. My experience includes designing, developing, and testing web-based systems to ensure they meet functional requirements and perform optimally under various conditions. Beyond my technical skills, I am actively involved in student organizations, where I have developed strong discipline, a solid work ethic, critical thinking skills, and the ability to work collaboratively in a team environment, even under pressure. This experience has also strengthened my communication and problem-solving skills. I am a highly motivated, detail-oriented individual, and committed to continuous learning and improvement. I look forward to applying my technical and analytical skills in real-world projects and further developing my expertise through internship opportunities in Software Engineering and Data Engineering, where I can contribute meaningfully while gaining valuable industry experience.

Education

Satya Wacana Christian University

bachelor's degree in informatics engineering

Current GPA 3.88/4.00

Related Coursework

Basic Programming | Database System | Discrete Mathematics | Introduction to Information Technology | English Language | Human Computer Interaction | Automata Language Theory | Computer Network | Algorithms and Data Structures | Statistic | Object Oriented Programming | Artificial Intelligence | Web Programming | Basics of Network Programming | Computer Organizational Architecture | Software Engineering | Operating System | Machine Learning | Research Methods | Data Security | Deep Learning | Optimization Engineering| Exploratory Data Analysis | Operations Research | Professional Ethics | Writing Scientific Papers | Web Service | Natural Language Processing | Data Science Methodology

Organizational Experiences

-
- **Senat Mahasiswa Fakultas Teknologi Informasi** **Jan 2025 – Dec 2025**
Bidang 3 Student Empowerment – Head of the Entrepreneurship Department
 - Manage and be responsible for work programs that foster students' entrepreneurial spirit.
 - Assist in the preparation of work program activity proposals and work program accountability reports.

Committee Experiences

-
- **Fasilitator OMB Universitas Kristen Satya Wacana 2025** **Agust 2025 - Present**
Assisting new students in the process of adapting to the campus environment, providing guidance and academic and non-academic information, and building supportive and inclusive communication.
 - **Fasilitator LDKM Gelombang 2 FTI UKSW 2025** **July 2025 – Agust 2025**
Accompanying and guiding participants in leadership development activities, building effective communication, and helping to create an active and collaborative group atmosphere.
 - **Panitia PURE: SEMINAR & COMPETITION 2024** **May 2024 – Dec 2024**
Event Division
 - Responsible for designing and managing the technical implementation of the event, preparing materials, ensuring that the event runs according to the rundown, and coordinating with the committee and event performers to ensure the event runs smoothly and on time.
 - **Panitia FTIDAYS 2024** **May 2024 – Dec 2024**
Event Consumption
 - Manage the consumption needs of the committee and participants, arrange the timely distribution of consumption logistics, and ensure the availability and quality of consumption during the activity.
 - **Satgas Tech For Hope FTI** **July 2024 – Agust 2024**
Event Consumption
 - Responsible for planning and providing food for the committee and participants, and children at the orphanage and ensuring that distribution runs effectively and in an organized manner.
 - **Satgas LKF FTI WRAP – UP** **Dec 2024**
Event Consumption

- Arrange the consumption needs for the LKF FTI Christmas service event, coordinate with the relevant team, and ensure smooth distribution during the event.
- **Satgas Dieco** **April 2025**
 Event Consumption and first aid kit
 - Manage consumption needs and ensure the readiness and handling of first aid (P3K) to support the safety and comfort of participants during community service activities.
- **Satgas Diece** **May 2025**
 Event Consumption
 - Organize the planning and distribution of consumption for the committee and participants in a structured and timely manner.
- **Satgas Festival Expo FTI UKSW “FEXPO”** **July 2025 – Sep 2025**
 Treasurer
 - Responsible for managing and recording event finances, preparing transparent financial reports, and ensuring budget use is in accordance with planning.

Experiences

-
- **Cisco Network Academy Bootcamp "introducing to Data Science"** **Feb 2026**
 - This training provides an understanding of data analytics, big data management, and the fundamental concepts of Artificial Intelligence and Machine Learning. It also provides insight into the application of these technologies in industry and a career outlook for data analysts.
 - **Oracle Academy Data Science** **Agust 2025 - Decs 2025**
 - Proficient in basic SQL for data processing and analysis.
 - Complete SQL database training that covers basic concepts, data processing, and data analysis.
 - **Website Development Project** **March 2025 - July 2025**
 - Collaborated with the team to develop an e-commerce website for Ngrawan village tourism using the Laravel framework and MySQL as the database.
 - Designed and built a user-friendly, responsive, and visually appealing website, optimized for a seamless shopping and travel experience.
 - Applied front-end and back-end development techniques to implement features such as tourism information, news, a product catalog gallery, a shopping cart, and a secure payment system.
 - Worked closely with lecturers to gather requirements, ensure functionality, and refine the website based on feedback.
 - **Teaching Assistant of Human Computer Interaction** **March 2025 - July 2025**
 - Assisted students in understanding fundamental concepts of how to use Figma features and basic application design concepts such as color and typography principles, WIMP, modal dialogs, and principles of mobile, desktop, and web application design.
 - Providing assistance to students by tutoring, grading assignments, and providing academic support to enhance student learning.

- **Application Design Project** **March 2024 - July 2025**
 - Design software applications, implementing user experiences and system functionality using Figma.
 - Collaborate with teams to define requirements, create wireframes, and implement features.
- **Teaching Assistant of Discrete Mathematics** **Sept 2024 – Dec 2024**
 - Assisted students in understanding fundamental concepts of discrete mathematics, including logic, trees, matrices, and combinations.
 - Providing assistance to students by tutoring, grading assignments, and providing academic support to enhance student learning.
- **Teaching Assistant of Operation System** **April 2026 – July 2026**
 - Assisted students in understanding fundamental concepts of operating systems, including process management, memory management, file systems, and CPU scheduling.
 - Provided academic support by tutoring students, grading assignments, and helping them solve course-related problems.
- **Project Web Servis** **April 2026 – July 2026**
 - Developed a microservices-based web application using Java Spring Boot, Spring Cloud Gateway, and Eureka Server.
 - Built RESTful APIs for product, customer, employee, and order services with JWT-based authentication.
 - Integrated MySQL and MongoDB databases and implemented inter-service communication using WebClient.
 - Performed API testing with Postman and collaborated with a development team using Git.

Skill

Technical Skills (Hard Skills):

- | | |
|---------------------|----------------------|
| • HTML/CSS | • Git |
| • JavaScript | • Sql |
| • PHP | • Oracle |
| • Python | • MongoDB |
| • C | • Spring Boot |
| • Java | • Laravel |
| • Linux | |

Data & AI Skills:

- | | |
|------------------------------|------------------------------------|
| • Data Analysis | • Image Processing |
| • Data Processing | • Object Detection (Basic – |
| • Basic Data Modeling | OpenCV / YOLO) |
| • ETL (Basic) | |

Soft Skills:

- **Public Speaking**
- **Project Management**
- **Critical Thinking**
- **Problem Solving**
- **Teamwork & Collaboration**
- **Time Management**
- **Communication**
